# Chapter 1 Overview

## 1.1 Description

The Local Playback software is used to play the video files downloaded from the Remote Backup software. You can also connect the SD cards, disks or disk groups of the device (e.g., DVR, NVR and DVS) to play the stored video files via the Local Playback software.

**Note:** For the details about Remote Backup software, refer to the *User Manual of Remote Backup Software*.

## 1.2 Running Environment

**Operating System:** Microsoft Windows 7/Windows 8/Windows 10/Windows 2008 (32-bit or 64-bit), Microsoft Windows XP SP3/Windows 2003 (32-bit).

**CPU:** Intel Pentium IV @ 3.0 GHz or above

**RAM:** 1 GB or above

**Video Card:** RADEON X700 Series

**Video Memory:** 256 MB or above

**Display:** 1024\*768 resolution or above

## 1.3 Conventions

In order to simplify the description, we define the “Local Playback software” as “software” in the following chapters.

## 1.4 Version and Manual

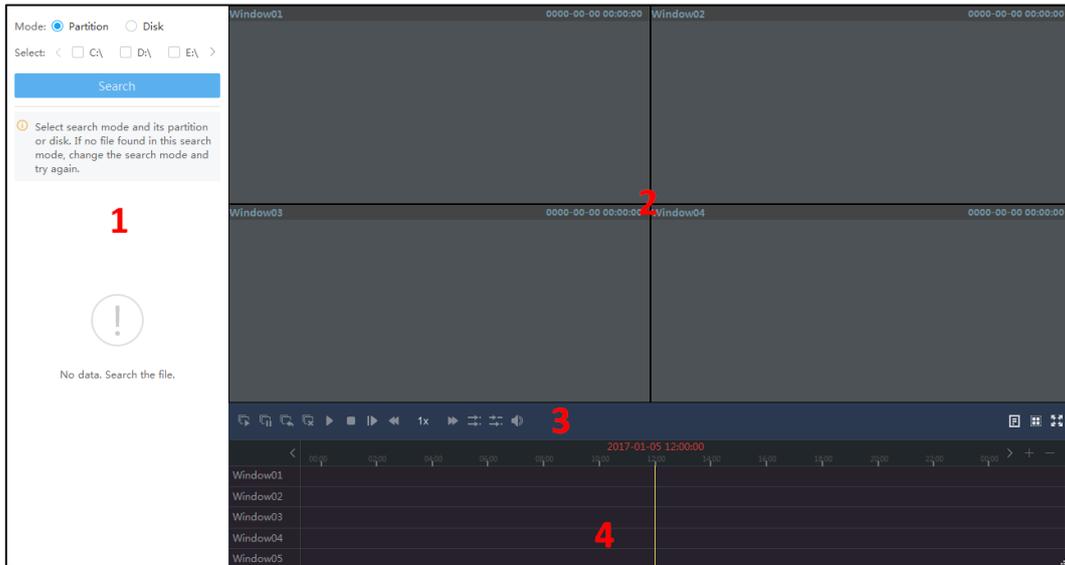

After installing the software, double-click  on the desktop to run the software. Click the icon  at the upper right corner of the software page to view the version information and get the User Manual of software.

# Chapter 2 Playback

## Purpose:

You can search and play the video files stored in the device SD cards, disks or disk groups, or the video files downloaded from the Remote Backup software in the Playback module. You can also download the video files to your PC.

Click **Playback** tab on the left of the software page to enter the Playback interface.

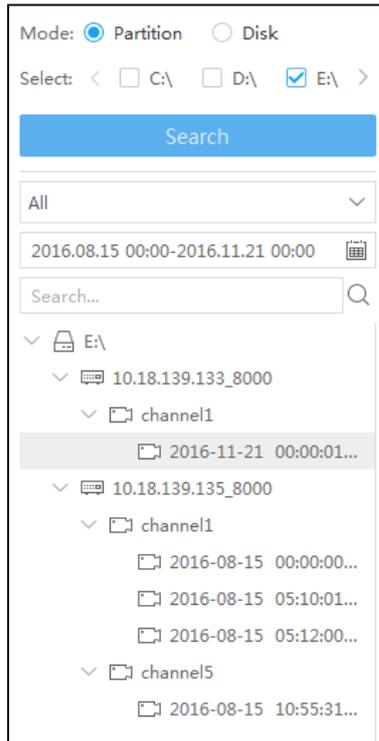

## Areas on Playback Page:

- 1 Search area
- 2 Playback area
- 3 Toolbar area
- 4 Timeline area

## 2.1 Searching Video Files

### Steps:

1. In the Search area, select **Partition** or **Disk** as the search mode.
  - **Search by Partition:** All the local partitions will display and you can search the video files downloaded from the Remote Backup software.
  - **Search by Disk:** Search the video files stored in the device SD cards, disks or disk groups.
2. Check the checkbox(es) in the Select field to select the partition(s) or disk(s).
3. Click **Search** to start searching the files. All the video file(s) and recording source device(s) of the selected partition(s) or disk(s) will list on the left panel.

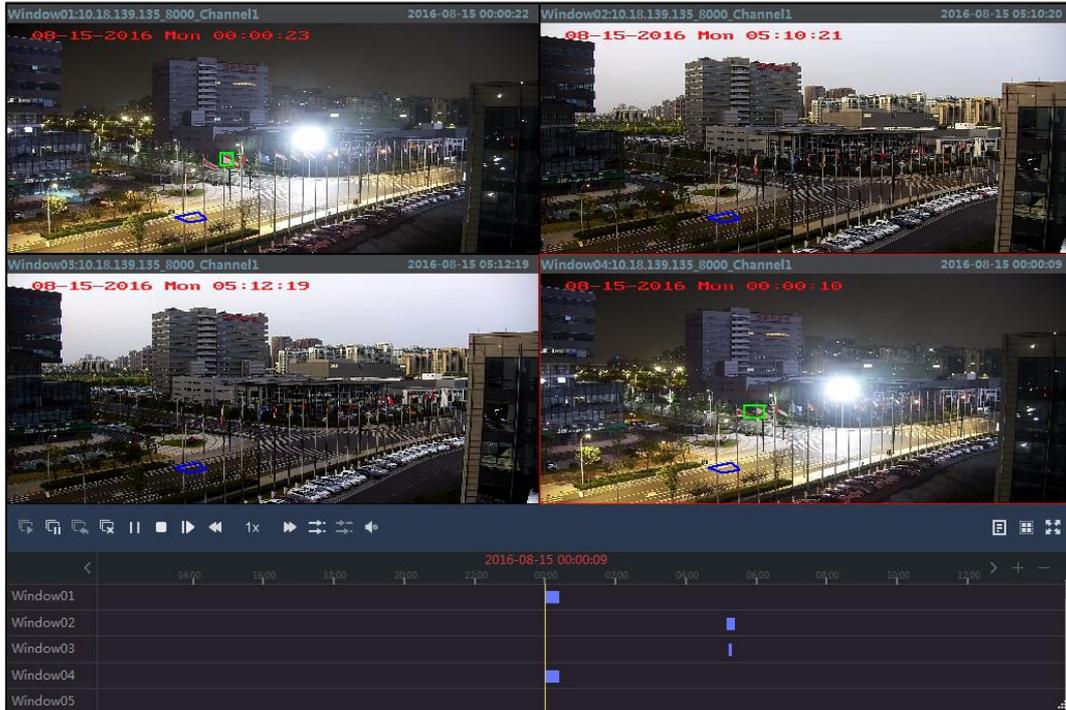

4. (Optional) You can set the filter conditions to filter the searching results.
- **Recording Type:** Click  to unfold the drop-down list and select a recording type, including continuous recording, motion detection recording, alarm triggered recording, etc., to filter the specified video files.
  - **Recording Time:** Click to specify the start time and end time of a time period for filter.
  - **Keyword:** Input the keyword in the search field and click to filter the matched results.

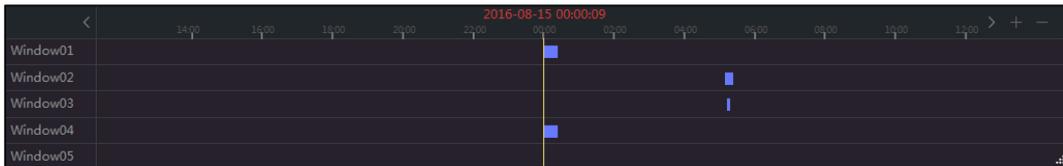

## 2.2 Playing Video Files

After searching the video files, you can choose to play a single video file, or play video files by device or channel.

- **Play a single video file:** Double-click a video file in the searching results or drag the video file to a display window to start playing this video.
- **Play by device:** Double-click a recording source device in the searching results or drag the device to the Playback area to start playing all the channels' video files of the device in different windows.
- **Play by channel:** Double-click a channel in the searching result or drag the channel to a display window to start playing all the video files of the channel.

When playing, the video(s) will be marked with  in the Timeline area of each window and you can check the time duration.

You can click / or drag the timeline to locate the time period. You can also click / or roll your mouse wheel to scale up or scale down the timeline for detailed view.

**Toolbar on the Playback Page:**

Move the cursor to the playback window to show the toolbar on the window:

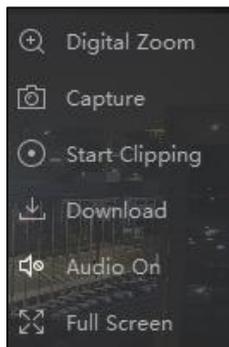

Icon	Name	Description
	Play All/Stop All	Start or stop all the playbacks.
	Pause All/Resume All	Pause or resume all the playbacks.
	Close All	Close all the playback windows.
	Pause/Play	Pause or start playing the video file.
	Single Frame	Play the video file frame by frame.

	Slow Forward/Fast Forward	Decrease or increase the play speed. And the speed rate will display at the upper right corner when you move the cursor to the display window.
	Synchronous/Asynchronous Playback	Click to play back the video files synchronously or asynchronously. <b>Note:</b> Up to 16-channel's synchronous playback is supported.
	Volume	Click to turn on/off the audio of the playback and adjust the audio volume.
	Window Information	Click to show or hide the window information, including device information and recording time.
	Window Division	Set the window division as 1-division, 4-division, 9-division or 16-division mode.
	Full Screen	Play the video in full-screen mode. Press <b>ESC</b> key to exit.
	Capture	Click to capture in the playback and the captured picture will be saved to your PC. <b>Note:</b> You can set the saving path for the captured picture. For details, refer to <i>Chapter 4 Settings</i> .
	Start/Stop Clipping	Click to start/stop the manual clipping. The video clips will be stored in your PC. <b>Note:</b> You can set the saving path for the video clips. For details, refer to <i>Chapter 4 Settings</i> .

You can move the cursor to the playback window and click the icon  appeared at the upper right corner to stop the playback of this window.

**Right-Click Menu of the Playback Window:**

Icon	Name	Description
	Digital Zoom	Click to enable or disable the digital zoom function. You can zoom in or out the selected area for detailed view in this function.
	Capture	Click to capture in the playback and the captured picture will be saved to your PC. <b>Note:</b> You can set the saving path for the captured picture. For details, refer to <i>Chapter 4 Settings</i> .

	Start/Stop Clipping	Click to start/stop the manual Clipping. The video clips will be stored in your PC. <b>Note:</b> You can set the saving path for the video clips. For details, refer to <i>Chapter 4 Settings</i> .
	Download	You can download the video files to the PC by file or by date. <b>Note:</b> For the details about downloading video files, refer to <i>Chapter 2.3 Downloading Video Files</i> .
	Audio On/Mute	Click to turn on/off the audio of the playback.
	Full Screen	Play the video in full-screen mode. Press <b>ESC</b> key to exit.

## 2.3 Downloading Video Files

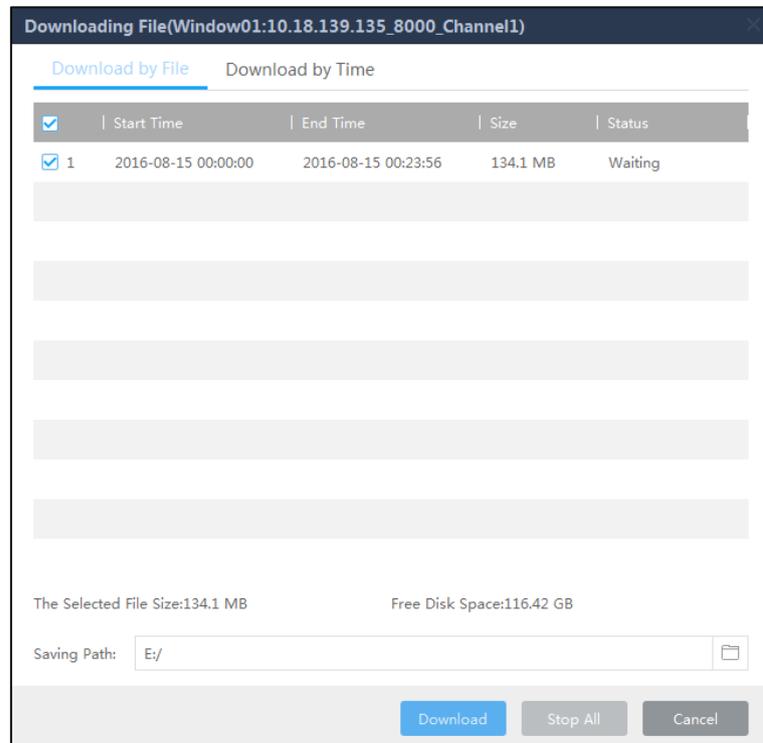

### Purpose:

You can download the video files to the PC by file and by time.

### 2.3.1 Downloading by File

#### Steps:

1. In the right-click menu of playback window, select **Download** to pop up Downloading File window.

2. In the **Download by File** tab, check the checkbox(es) to select the file(s) and the selected file size statistics will display.
3. Click  to set a saving path.

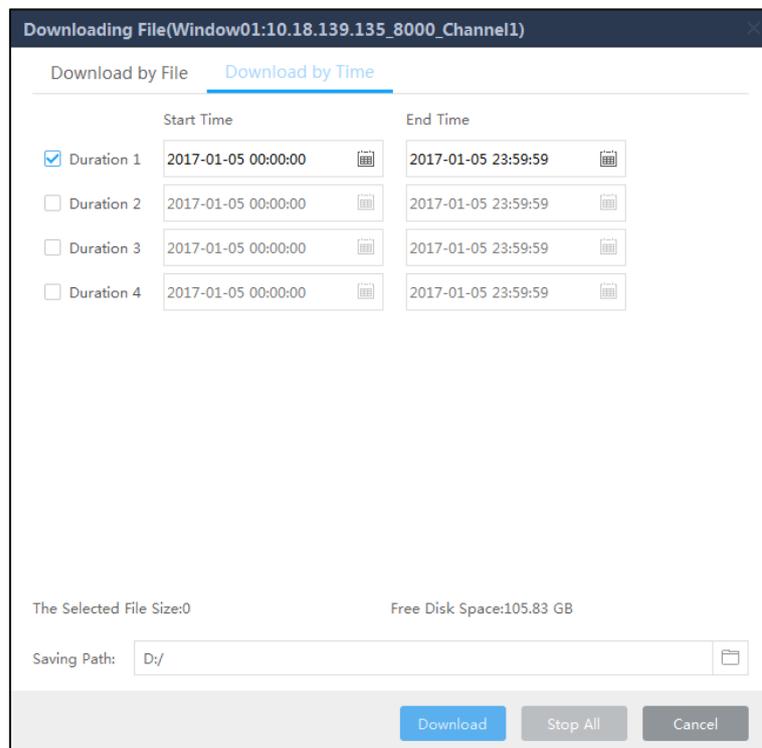

**Note:** You can set a default saving path for the downloaded files. For details, refer to *Chapter 4 Settings*.

- Click **Download** to start downloading the file(s) and the free space of selected disk will be refreshed.  
(Optional) Click **Stop All** to stop all the downloading process.

## 2.3.2 Downloading by Time

### Steps:

- In the right-click menu of playback window, select **Download** to pop up Downloading File window.
- Click **Download by Time** tab to enter the interface.

- Check **Duration** checkbox(es) to enable setting start time and end time for the duration(s). And the size statistics of all the files in the configured duration(s) will display.

**Note:** Up to 4 durations can be set.

- Click  to set a saving path.

**Note:** You can set a default saving path for the downloaded files. For details, refer to *Chapter 4 Settings*.

- Click **Download** to start downloading all the file(s) in the duration(s) and the free space of the selected disk will refresh.  
(Optional) Click **Stop All** to stop all the downloading process.

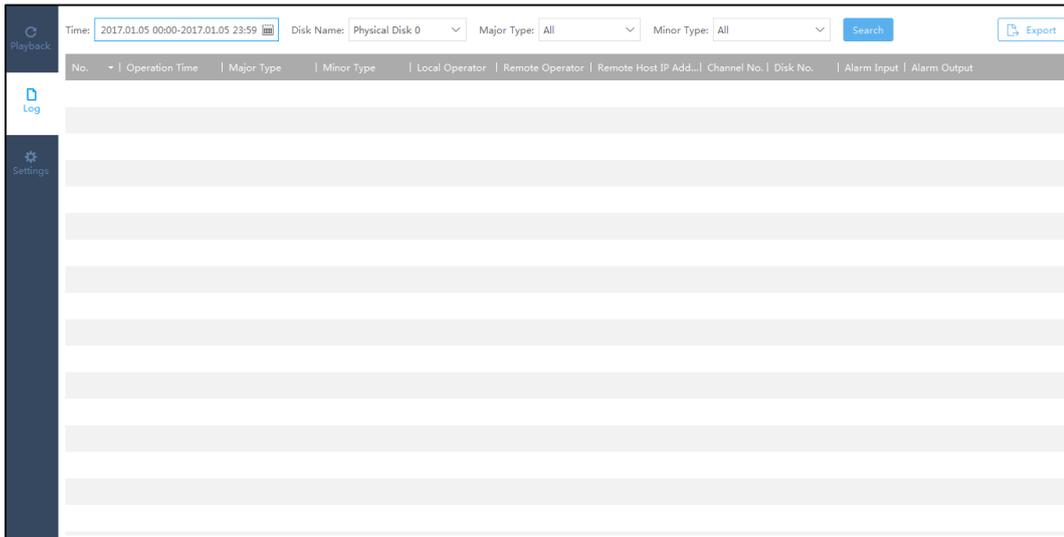

## Chapter 3 Log Search

### **Purpose:**

You can search and view the log files stored in the SD cards, disks or disk groups of devices (e.g., DVR, NVR and DVS).

### **Steps:**

1. Click **Log** tab on the left of the software page to enter the Log Search interface.

2. Set the search conditions, including log time, disk name, log major type and minor type.
  - **Time:** Click  to set start time and end time for searching the log files in the specified time period.
  - **Disk Name:** Select a partition or disk in the drop-down list to search all the stored log files stored.
  - **Major Type:** Select a log major type, including alarm log, exception log, operation log and information in the drop-down list to search the log files with the same type.
  - **Minor Type:** After selecting the major type, you can select a minor type to narrow the search condition.
3. Click **Search** and the matched log files will display on the page.  
You can check the operation time, local operator, remote operator, remote host IP address, etc., of the log file.
4. (Optional) You can click **Export** to set a saving path and save all the searched log files to the PC.

## Chapter 4 Settings

### **Purpose:**

The Settings module provides the function of setting capture, clip and download parameters.

### **Steps:**

1. Click **Settings** tab on the left of the software page to enter the Settings interface.

The screenshot displays the Settings interface of the software. On the left, a dark blue sidebar contains three tabs: 'Playback' (with a play button icon), 'Log' (with a document icon), and 'Settings' (with a gear icon and highlighted in light blue). The main content area is divided into three sections: 'Capture Settings', 'Clip Settings', and 'Download Settings'. Each section contains a 'Picture Format' or 'File Packet Size' dropdown menu and a 'Saving Path' text input field with a folder selection icon to its right. The 'Capture Settings' section shows 'Picture Format' set to 'JPEG' and 'Saving Path' set to 'C:/'. The 'Clip Settings' and 'Download Settings' sections show 'File Packet Size' set to '1G' and 'Saving Path' set to 'C/'. A blue 'Save' button is located at the bottom center of the main content area.

2. Click  to unfold the drop-down list and select the picture format for capture, or select file packet size for clip and download.  
**Note:** By default, the picture format is JPGE, and the file packet size is 1 GB.
3. Click  to set a saving path for captured pictures, video clips and downloaded files.
4. Click **Save** to save all the settings.
